25X1

Chief,
Industrial Security Support Division

Attachment

SECRET

SECRET

c. Industrial Security Support

1. Policy Program

To meet the objectives established for the Industrial Security Support Division, the Division will become the central point for the issuance of CIA industrial security policy, guidance, and support as required.

2. Industrial Security Audit Program

Conduct audits of the Agency industrial security program as required in order to insure the implementation of uniform industrial security policy consistent with operational requirements.

3. Industrial Security Clearance Program

Review and realignment of current industrial security clearance activity with the view to consolidate the procedures, nomenclatures, and activities to provide more uniformity and expeditious service to the Agency contracting activities.

4. Inspection Support Program

Conduct industrial security inspections to support the contracting offices in the maintenance of their contracts as they require.

5. Counter-Intelligence Program

Industrial security activities will be reviewed to identify counterintelligence information and assist in the implementation of counterintelligence programs.

6. Management Information Program

Through automatic data processing equipment top management will be provided a current status of the security of contracting activity in CIA.

7. Orientation & Training Program

Industrial security education programs will be developed for Career Security Officers, Agency contracting offices and technical officers, contractors and their personnel.
